Under Mill Oscillator
Designed with extra structural and gridwork reinforcement to ensure trough integrity that will withstand the severe conditions found underneath auto-shredders.

Drum Magnet Feeder
GK's Two-Mass Vibratory Feeders dynamically compensate for surge loadings to provide uniform feed to the drum magnet.

Rod Deck Screen
Designed for separation of difficult material that is prone to sticking or blinding in traditional screening applications using the flexibility of the individual rods within the deck section.

High Stroke Feeder
Dynamic response to load surges, increased feed capacity, exceptional reliability, and ease of maintainability. High Stroke Feeders are specifically designed to enhance your process.
