

STACKER CONVEYOR

**ELEVATE YOUR AGGREGATE GAME.
PROFITABILITY. MAINTENANCE. SAFETY.**

**A heavy-duty solution
built to efficiently
transport bulk materials.**

Streamline Material Handling

Tuffman® Stacker Conveyors are a heavy-duty solution built to transport bulk materials efficiently for loading, stockpiling, and more. Tuffman® stacking conveyors can transport bulk materials such as ores, aggregates, coal, and more into piles, allowing you to stockpile and load your products quickly and easily. We also offer add-ons such as customized hoppers, radial drive units, and catwalks.

Tuffman® equipment is built to integrate into your existing facility to fit your needs best. Our in-house engineering, controls, and field service team can integrate our stacker conveyors seamlessly into your existing systems, making them the perfect choice for an upgrade.

Why Tuffman® Stacker Conveyors

- Standard lengths come in 40', 50', and 60'
- Custom lengths available on request
- Crossbelt magnet integration
- Built to last with heavy-duty materials
- Integrates seamlessly into existing systems
- Available in stationary and radial designs
- Different belt options are available depending on the material handled (smooth, cleated)
- 3 phase 460 volt drive
