

BUCKET ELEVATOR

Elevate Your Material Handling

Easily elevate your material in a small footprint with Tuffman® bucket elevators. Tuffman® bucket elevators are ideal for conveying many bulk materials such as sand, pellets, ash, shot, fertilizer, powder, and more. These bucket elevators feature a centrifugal discharge and can handle up to 175 tons per hour standard. The material transfer buckets are made of nylon material or ductile iron, capable of handling extreme temperatures. The vertical nature of bucket elevators helps decrease your footprint and increase throughput.

The benefit of working with Tuffman® is experienced in every aspect of your journey. From the process of customizing your bucket elevator(s) to suit your exact needs alongside our team of highly experienced engineers to seeing your facility run more efficiently than ever, you'll be happy you chose Tuffman® for your facility's needs.

Why Tuffman® Bucket Elevators

- Heavy-duty
- Easy operation
- Longer service life
- Customizable
- Capable of handling large capacities
- Winged tail pulley to prevent belt damage
- Lagged head pulley for wear protection and prevention of belt slipping
- Rubber belting
- Nylon or ductile iron buckets are available
