

## MONITORING HUB

**ELEVATE YOUR MAINTENANCE GAME.**  
**PREDICT. PREVENT. PROTECT.**

### PREDICT AND PREVENT DOWNTIME WITH VERTEX™ REAL-TIME VIBRATION MONITORING.

Stop reacting to equipment failures and start preventing them. The Vertex™ Hub is your all-in-one solution for real-time vibration monitoring and data collection. By visualizing your machine's health, you can detect abnormalities before they spiral into costly repairs.

Vertex™ offers flexible management to fit your facility's IT needs. Use the GK APEX™ App for immediate Bluetooth analysis on the floor, or export up to 24 days of internal data via USB to Excel for deep-dive preventative maintenance.

- Compatible with GK's stroke monitoring app/vibration monitoring software
- Visualize your vibration data to better understand your equipment's health
- Data storage capability with up to 24 days on-device
- 4-20mA output for both sensors to use for remote vibration monitoring, long-term data visualization, and analysis
- 3-axis (XYZ) sensors with FFT
- Attaches to both the trough and exciter to monitor the stroke of both masses (exciter & trough), making it ideal for Two-Mass machinery
- Bluetooth connectivity
